EDUCATION

●Bachelor of Technology in Information Technology

Sreenidhi Institute of Science and Technology, Hyderabad

2022 – 2026

CGPA: 8.87

●Intermediate - SSC (MPC)

Narayana Junior College, Hyderabad

2020 – 2022

Percentage: 95%

PROJECTS

●Job Market Intelligence Dashboard

Data Visualization Project / Tableau, Excel, Python (Pandas, NumPy), Git

- Designed and deployed an interactive Tableau dashboard analyzing 5,000+ real-world job listings to uncover market trends, skill demands, salary insights, and experience expectations across domains.
- Conducted exploratory data analysis (EDA) using Python to extract top-demand skills in Data Science, AI/ML, and Web Development.
- Designed interactive filters for customized insights based on domain, job role, and location, improving data accessibility for over 200 students in career planning and decision-making.
- Leveraged visual storytelling and real-time job data to support data-driven career choices, enhancing career intelligence and employability insights.

●QueryGenie – Natural Language to SQL using LLMs

Converted user queries into executable SQL with Generative AI (Gemini LLM).

- Created an AI-based interface that translated natural language questions into executable SQL queries with 35% reduction in manual query errors.
- Trained LLMs on 300+ domain-specific query samples to improve contextual understanding and retrieval accuracy.
- Enabled real-time SQL generation with <2s latency using Gemini LLM and prompt engineering.
- Implemented JSON-based schema mapping and tested across 10+ different datasets for robustness.

●AcadStream – Academic Analytics Platform

Built on Apache Druid to monitor and analyze academic performance data.

- Designed a scalable pipeline to process 10,000+ student academic records with 40% faster query responses than traditional systems.
- Computed metrics like SGPA, subject-wise performance, and attendance with sub-second latency using Druid's distributed architecture.
- Automated data ingestion via JSON batch loaders, reduced manual update effort by 60%.
- Supported academic decision-making through visualized trend reports and performance alerts.

EXPERIENCE

●Internshala Student Partner

Internshala

Feb 2024 – Apr 2024

Remote

- Managed outreach campaigns targeting 100+ peers to promote data science and technology internships.
- Collected, processed, and interpreted engagement data to refine promotion strategies.
- Enhanced communication and interpersonal skills by conducting workshops and peer sessions, resulting in a 20% increase in student engagement with online learning resources.

TECHNICAL SKILLS

- **Programming:** Python, SQL, Java, JSON
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, spaCy, Hugging Face, Prompt Engineering
- **Machine Learning:** Regression, Classification, Clustering, Generative AI (Gemini LLM)
- **Tools & Platforms:** Jupyter, Git, GitHub, Streamlit, Apache Druid
- **Visualization:** Tableau, Streamlit, Plotly, Insight Storytelling, Exce
- **Data Handling:** EDA, Data Cleaning, Feature Engineering, Wrangling, Normalization
- **Soft Skills:** Problem Solving, Communication, Leadership, Quick to Adapt, Remote Collaboration

CERTIFICATIONS

- GenAI with LLMs May 2025
- AWS Data Engineering Sep 2024
- Accenture Data Viz Simulation May 2024
- SQL for Data Science Apr 2024
- Tableau 2024.1: Essential Training Mar 2025
- Tableau Dashboards Mar 2025
- Excel Dashboards May 2025
- Git Essential Training Mar 2025
